

## Tubewire Cablehead\*

The Tubewire Cablehead attaches the Continuous Monitoring Tool to the tubewire.

The simple and easy to install cablehead is available for both 1/4" and 1/8" tubewire sizes. Two crimping ferrules are used in the cablehead to provide a seal between the cablehead to the cable as well as to provide strain relief. Strain reliefs are stackable to allow for as many contact points as desired.

The Cablehead is available in a variety of diameters and materials for 1/8" and 1/4" tubewires. Subworks' Cablehead is designed to fit specifically to our Continuous Monitoring Tool.

FEATURES	
Easy to Install	
Stackable Strain Relief
